

Product Privacy Data Sheet: Here

Prepared by: Daniel Lang, Developer

Date: April 2026

Version: 1.0

Introduction

This document describes the data privacy and security practices of the Here application. It is intended to assist school districts in determining whether Here meets the requirements of the Family Educational Rights and Privacy Act (FERPA), the Children's Online Privacy Protection Act (COPPA), and the Iowa Student Data Privacy Act (Iowa Code § 279.71).

Product Overview

Here is a scheduling, attendance, and student engagement application designed for use by small alternative high schools. It manages complex scheduling patterns including A/B day rotations, community college courses, off-campus internships with geolocation check-in, independent study blocks, and monitoring sessions.

Here is a web application accessible at sayhere.xyz via any modern web browser. It does not require installation of any native application.

Developer: Daniel Lang

Website: sayhere.xyz

FERPA Agreement

As related to the Family Educational Rights and Privacy Act ("FERPA") (20 U.S.C. Section 1232g), Here agrees:

- 1. School ownership of records.** Student records obtained by Here from an educational institution continue to be the property of and under the control of the educational institution. The educational institution retains full ownership rights to the personal information and education records it provides to Here.
- 2. Student-generated content.** Here collects student-generated content in the form of status updates (plans, progress, and reflections written during check-in flows) and responses to teacher-created posts. Students retain the ability to view and edit their own content. The educational institution may request export or deletion of this content at any time.

3. **Purpose limitation.** Here will not use any information in a student record for any purpose other than providing the scheduling, attendance, and engagement services described in this document and in Here's Terms of Service and Privacy Policy.
 4. **Parent and student access.** Parents, legal guardians, or eligible students may review personally identifiable information in the student's records and correct erroneous information by contacting their educational institution. Administrators within the educational institution have access to all student records through the application's admin interface and can modify or delete records directly.
 5. **Security and confidentiality.** Here is committed to maintaining the security and confidentiality of student records. Toward this end, Here takes the following actions:
 - a. Access to student data in the production database is limited to the application developer in their capacity as system administrator, and is restricted to maintenance and support purposes only.
 - b. The application enforces role-based access controls through Row Level Security (RLS) policies at the database level, ensuring that students can only access their own records, teachers can only access records for their assigned activities, and administrators can access records within their organization.
 - c. Personal information is protected with technical and administrative security safeguards to protect against unauthorized access, release, or use, as described in the Security Protocols section of this document.
 6. **Breach notification.** In the event of an unauthorized disclosure of a student's records, Here will promptly notify the educational institution and affected users unless specifically directed not to provide such notification by law enforcement officials. See the Data Breach section of this document for notification procedures.
 7. **Data deletion.** Here will delete or de-identify personal information when it is no longer needed, upon expiration or termination of the agreement with an educational institution, or at the direction or request of the educational institution. Deletion will be completed within 30 days of request.
 8. **FERPA compliance cooperation.** Here agrees to work with the educational institution to ensure compliance with FERPA, including providing parents, legal guardians, or eligible students with the ability to inspect and review student records and to correct any inaccuracies therein.
 9. **No targeted advertising.** Here prohibits using personally identifiable information in student records to engage in targeted advertising. Here does not display advertising of any kind.
 10. **Notice of material changes.** Here will not make material changes to its Terms of Use or Privacy Policy — including significant changes impacting the collection, use, disclosure, or retention of data — without prior notice to the educational institution.
-

Iowa Student Data Privacy Act (Iowa Code § 279.71) Compliance

As related to Iowa Code § 279.71 (Student Online Personal Information Protection), Here agrees:

Prohibitions:

- 1. **No targeted advertising.** Here does not engage in targeted advertising using student data or any personally identifiable information gathered through the application.
- 2. **No commercial profiling.** Here does not use information, including persistent unique identifiers, to amass a profile about a K–12 student, their families or guardians, or educators, except in furtherance of K–12 school purposes (scheduling, attendance tracking, and student engagement).
- 3. **No sale of data.** Here does not and will not sell, rent, or otherwise provide personally identifiable information to any third party for monetary gain.
- 4. **No unauthorized disclosure.** Here does not disclose student information unless for the purposes permitted under § 279.71, including: furtherance of K–12 school purposes, legal or regulatory compliance, responding to judicial process, protecting the safety or security of users, or at the request of the student or the student's parent or guardian.

Obligations:

- 5. **Security practices.** Here implements and maintains security procedures and practices consistent with current industry standards and all applicable state and federal laws, as described in the Security Protocols section of this document.
- 6. **Data deletion on request.** Here will delete a student's covered information when requested by the school district, as described in the Data Retention and Deletion section of this document.
- 7. **Third-party protections.** Here's infrastructure provider (Supabase, Inc.) is contractually required to maintain security standards consistent with those described in this document. Supabase does not have application-level access to student data and does not use student data for any purpose other than providing database hosting services. See the Third Parties section for details.

Third Parties

Here does not sell, trade, lease, or loan the personal information it collects or maintains to any third party for any reason, including direct marketers, advertisers, or data brokers.

Here uses the following third-party service providers to operate the application:

Provider	Service	Data Handled	Security
Supabase, Inc.	Database hosting, authentication, edge functions	All application data (stored in PostgreSQL on AWS infrastructure, US region)	SOC 2 Type II compliant; encryption at rest (AES-256) and in transit (TLS 1.2+); access controls and audit logging

Vercel, Inc.	Web application hosting and domain management	No student PII — serves static application files only	SOC 2 Type II compliant
Resend, Inc.	Transactional email delivery (password reset emails, account invitations)	Email addresses (transient — used for delivery only, not stored by Resend beyond delivery logs)	SOC 2 Type II compliant
GitHub, Inc.	Source code hosting; receives anonymized bug reports submitted through the in-app feedback form	Feedback submissions may include user-provided descriptions of issues; no student PII is transmitted automatically	SOC 2 Type II compliant

Here will provide the educational institution with an updated list of third-party service providers upon request. Here will notify the educational institution before adding any new third-party provider that would have access to student personally identifiable information.

Product Data List

Data Collected from Students

#	Data Element	Purpose	Collection Method
1	First name, last name	User identification; displayed on rosters, attendance records, and schedule views	Entered by school administrator
2	Preferred name	Display in student-facing views when set	Entered by school administrator or student
3	Email address	Account authentication (login); password reset delivery	Entered by school administrator
4	Grade level	Organizational grouping	Entered by school administrator
5	Attendance status (present, absent, excused, tardy)	Attendance tracking — the core function of the application	Marked by teacher through the application
6	Check-in / check-out timestamps	Verifying student participation in internships, online courses, and independent study blocks	Submitted by student through the application

7	Geolocation (latitude/longitude)	Verifying student presence at off-campus internship sites at the moment of check-in. Collected only for students enrolled in activities where geofence verification is enabled. Not tracked continuously — captured once at the moment of check-in only.	Submitted by student's device with explicit browser permission prompt
8	Status updates (plans, progress, reflections)	Student self-reporting on their work during check-in/check-out flows	Written by student
9	Post responses	Student replies to teacher-created prompts	Written by student
10	Comments	Discussion on posts, responses, and status updates	Written by student
11	Presence wave timestamps	Optional daily "I'm here" acknowledgment with streak tracking	Submitted by student (one tap)

Data Collected from Staff (Teachers, Administrators)

#	Data Element	Purpose
1	First name, last name, preferred name	User identification
2	Email address	Account authentication; password reset
3	Role(s) (teacher, admin, or both)	Access control — determines which features and data are visible

Data Collected Automatically

#	Data Element	Purpose
1	Authentication session tokens	Maintaining logged-in sessions; managed by Supabase Auth
2	Timestamps on all records	Audit trail — when records were created or modified

Data NOT Collected

Here does **not** collect or store:

- Social Security numbers or government-issued ID numbers
- Financial information, free/reduced lunch status, or socioeconomic data
- Medical or health records
- Disability or special education status

- Disciplinary records
 - Parent/guardian contact information (the school maintains this separately)
 - Biometric data (fingerprints, facial recognition, etc.)
 - Social media profiles or activity
 - Browser history, cookies, or cross-site tracking data
 - Behavioral or psychological profiles
-

Data Review Process

Students can view their own attendance records, check-in history, status updates, and other personal data through the application at any time.

Administrators can view, modify, and delete any student data within their organization through the admin interface.

Any request for access to data not available through the application interface should be directed to:

Daniel Lang

danslang@gmail.com

(319)270-7639

Security Protocols

Data in Transit

All data transmitted between the user's browser and Here's servers is encrypted using TLS 1.2 or higher (HTTPS). The application enforces HTTPS for all connections. API requests between the application frontend and Supabase backend are authenticated using JSON Web Tokens (JWT).

Data at Rest

Student data is stored in a PostgreSQL database hosted by Supabase on Amazon Web Services (AWS) infrastructure in the United States. Supabase encrypts all data at rest using AES-256 encryption. Database backups are encrypted using the same standard.

Access Controls

Here enforces access controls at multiple levels:

- **Authentication:** All users must authenticate with an email address and password. Password reset is handled via secure email token. Passwords are hashed using bcrypt (handled by Supabase Auth — plaintext passwords are never stored or accessible).
- **Row Level Security (RLS):** The PostgreSQL database enforces row-level security policies on every table. These policies ensure that database queries return only the records a user is authorized to see,

regardless of what the application code requests. Students see only their own data. Teachers see only data for activities they are assigned to. Administrators see all data within their organization. Cross-organization data access is not possible.

- **Role-based application access:** The application interface restricts features based on user role. Students cannot access admin or teacher views. Teachers cannot access admin configuration. Administrators have full access within their organization.

Personnel

- **Access limitation:** The application developer (Daniel Lang) is the sole individual with direct database access. This access is used for system maintenance, debugging, and responding to data requests from the educational institution. No other individuals have credentials to the production database.
- **Third-party access:** Supabase, as the infrastructure provider, does not access customer databases in the course of normal operations. Access is limited to infrastructure maintenance and requires explicit authorization per Supabase's security policies.

Vulnerability Management

The application uses actively maintained open-source dependencies (React, Supabase client libraries, TanStack Query) which receive regular security updates. Dependencies are reviewed and updated on an ongoing basis.

Data Breach

In the event of any unauthorized access to or disclosure of student data maintained by Here, the following notification procedure will be followed:

Timeline: Here will notify the educational institution within 72 hours of becoming aware of the breach.

Notification method: Written notice will be sent to the educational institution's designated contact via email, followed by a phone call to confirm receipt.

Information included in the notice:

- Contact information for Here's developer
- A description of what happened
- The types of personal information that were or may have been compromised
- The date and time of the breach, if known, or a best estimate
- Whether the notification was delayed as a result of a law enforcement request
- Steps taken to contain and remediate the breach
- Steps taken to prevent recurrence
- Recommendations for affected individuals on how they can protect themselves

Iowa breach notification law: Here will comply with the notification requirements of Iowa Code § 715C.2 (Personal Information Security Breach Protection), including notification to affected Iowa

residents and, where required, to the Iowa Attorney General.

Data Retention and Deletion

During active use: Student data is retained for the duration of the school's use of the Here application. Attendance records, check-in history, and status updates are retained across academic terms to support longitudinal reporting.

Administrator-initiated deletion: School administrators can deactivate student accounts and request deletion of individual student records at any time through the application interface or by contacting the developer.

Upon termination: Following the termination of a school's use of Here, the school may request that all student data be exported and/or deleted. Here will:

- Provide a complete data export in a standard format (CSV or JSON) within 14 days of request
- Delete all student data from the production database and backups within 30 days of the export being confirmed received, unless the school or applicable regulations require continued retention
- Confirm deletion in writing to the educational institution

Student-initiated: Students may request deletion of their own student-generated content (status updates, comments, post responses) through the application. Attendance records and check-in logs, as educational records maintained on behalf of the school, are retained at the school's discretion and cannot be deleted by students unilaterally.

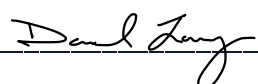

COPPA Compliance Note

The Children's Online Privacy Protection Act (COPPA) applies to the collection of personal information from children under the age of 13. Here is designed for use in high school settings (grades 9–12), where students are typically 14 years of age or older.

In the event that a student under the age of 13 uses Here, the educational institution acts as the consenting party on behalf of the parent or guardian, consistent with FTC guidance permitting schools to consent to the collection of student information for educational purposes. Here does not collect more information than is reasonably necessary to provide the scheduling and attendance services described in this document.

Accuracy Statement

Daniel Lang, developer of Here, hereby confirms the accuracy and truthfulness of all information contained in this product privacy data sheet.
